### **1.0 Introduction**

As per instructed by Fr David Nettikkaden , Executive Manager, Jyothi Engineering college, Cheruthuruthy .we have conducted a one day practical training to Dr.Anju Jose of St Thomas college Thrissur on water quality and sanitation . This initiative is on the the reason that chemistry department of St .Thomas college , Thrissur is starting a water and soil testing laboratory with intension to provide service to the general public . It is learned that instruction from the executive manager is based on the request from principal St.thomas college and accordingly process for imparting training was initiated . In order to arrive at the various requirement of the training a process of training need assessment was carried out d etails of which is given below

## **2.0 Training Need Assessment ( TNA)**

In order to decide the pattern of the training a training need assessment (TNA)process was carried out in consultation with Dr Anju and gathered that she is having excellent academic background in the field as given below

1)Dr. Anju Rose P. She is a distinguished alumna of Department of Chemistry, St.Thomas college,Thrissur and completed her M.Sc. in Environmental Chemistry from the Central University of Kerala

2)She has also completed Ph.D. from St.Thomas college in the field of water purification. 3) She has also successfully completed a specialized course in water analysis from the Cochin University of Science and Technology (CUSAT).

During discussion it is clarified beyond doubt that she has calibre in the field and she do not require basic training but requirement in various practical aspects of water quality and sanitation which are listed below

- a. She needs to have an overall knowledge in the water quality and sanitation scenario of Kerala
- b. She needs to have an overall knowledge in the various remedial measures of water quality issues which are required while running the laboratory
- c. She needs to have an overall knowledge in the various water commercial treatment processes

### **3.0 Schedule and conduct of the programme**

Preliminary interaction and the training was started on 27.7.2026 from 10.am to 4pm

10.am to 11am – Preliminary discussions and assessment of training and familiarisation lab procedure

11am to 12.30pm – Social and scientific factors for water testing

1.30 – 3.30- Water quality scenario in Kerala state

**Dr.Anju With Prof .M.G Cyriac Head CWRE**

Further requirement of the training involves the following

- a. Commercial Water treatment methods
- b. Environmental Planning of buildings and the surroundings
- c. Related subjects as per requirement

However it appears appropriate to do these parts in due course of time as and when the laboratory starts functioning. However the following literatures were given to her for follow up

1. Manual of CWRE used for routine water quality analysis in the lab
2. Malayalam book on Jalavitjhanam- Cwre publications
3. Malayalam -Paristhithi malineekaranam – Prakerthiyude vilapanagal- CWRE Publication

Dr.Anju with Prof.M.G Cyriac and Vini,P sanitary chemist CWRE

#### **4.0 Conclusion**

The scheduled training was completed on 27.7.2026 .Remaining part of the training will be completed in due course of time as per requirement . It appears better that such subjects to be of beneficial once laboratory start functioning . Dr. Anju is also advised to become familiar with our literature that are given to her . whatever assistance required from our side will be provided as per requirement
